■ Number of exchanges students

Due to accommodation capacity and course registration constraints, SeoulTech has implemented a strategic enrollment limitation starting from the 2024 academic year. This decision reflects our commitment to maintaining high standards of education, fostering a conducive learning environment, and ensuring that each student receives personalized attention and support.

We will strive to maintain a balanced number of inbound and outbound exchange students.

If none of SeoulTech students have participated in your exchange program during the past two semesters only one open seat will be allocated to your university.
Please note that we are unable to accept more than two students from each partner university per semester. If there is any uncertainty regarding the quota, we strongly recommend contacting SeoulTech in advance before beginning your selection process.
